DUCKBILL BREACHING TOOL

TAC30 KELLY-STYLE – LAYS FLAT

A Kelly-style Halligan variant — the TAC30 — designed in collaboration with top first responders to lay flat for tighter transport, locker stowage, and rapid deployment. Drop forged in one piece from 4140 alloy steel with heat-treated fork and pry ends. No pike, so the bar stows flush against shields, vehicle racks, and emergency response lockers.

FLAT-PROFILE BREACHING
DROP FORGED 4140 STEEL

ONE-PIECE FORGED – TUNED & DRESSED FOR FORCIBLE ENTRY

KEY FEATURES

DROP-FORGED 4140 ALLOY STEEL

Forged in one piece from .987" octagon 4140 — no welds, no joins. Working ends are heat-treated for maximum strength, toughness, and wear resistance.

LAYS FLAT – NO PIKE

Kelly-style design with no pike — the bar lays flat against shields, vehicle racks, and locker walls for tighter transport and stowage.

TUNED & DRESSED OUT OF BOX

Forks thinned, gap and set marks placed, working surfaces dressed at the factory — ready to deploy without time on the bench.

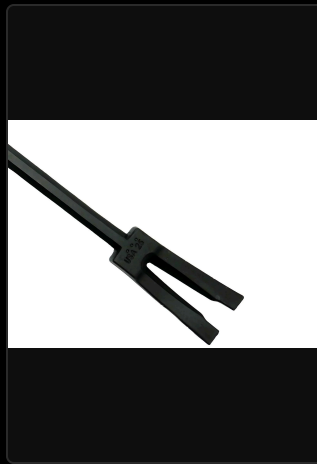

2" OFFSET ADZE WITH ARC

2"-wide offset adze with a 30" radial arc and reference line — engineered for leverage, controlled prying, and consistent breach angles.

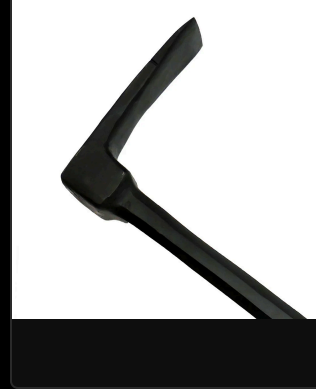

MATTE BLACK FINISH

Matte black finish deters rust and supports low-visibility deployments — pairs cleanly with shields and emergency response lockers.

FORGED. DRESSED. READY.

TESTED & CERTIFIED

DESIGNED WITH TOP FIRST RESPONDERS AND LAW ENFORCEMENT

Drop forged in one piece from 4140 alloy steel. Heat-treated working ends. 2" offset adze with 30" radial arc and reference line. Squared shoulders for flat striking. Key-in-knob fork gap. Flat-stow profile with no pike. Matte black finish for rust deterrence and low-visibility deployment.

IDEAL FOR:

LAW ENFORCEMENT

FIRE & RESCUE

ENTRY & BREACH TEAMS

SWAT & TACTICAL

SCHOOL EMERGENCY LOCKERS

VEHICLE RACK CARRY
