## HALLIGAN BREACHING TOOL

30" OAL — DROP-FORGED 4140

A tuned-and-dressed Halligan-style forcible-entry tool engineered with top first responders and law enforcement. Drop forged in one piece from 4140 alloy steel — fork, pike, and adze working ends are heat-treated for maximum strength, toughness, and wear resistance. 30" overall length, matte black finish, ready out of the box for fire, police, and tactical breaching.

TUNED & DRESSED

**DROP FORGED 4140 STEEL**

ONE-PIECE FORGED CONSTRUCTION — RATED FOR FORCIBLE ENTRY

### KEY FEATURES

#### DROP-FORGED 4140 ALLOY STEEL

Forged in one piece from .987" octagon 4140 — no welds, no joins. Working ends are heat-treated for maximum strength, toughness, and wear resistance.

#### TUNED & DRESSED OUT OF BOX

Forks thinned, gap and set marks placed, working surfaces dressed at the factory — ready to deploy without time on the bench.

#### 2" OFFSET ADZE WITH ARC

2"-wide offset adze with a 30" radial arc and reference line — engineered for leverage, controlled prying, and consistent breach angles.

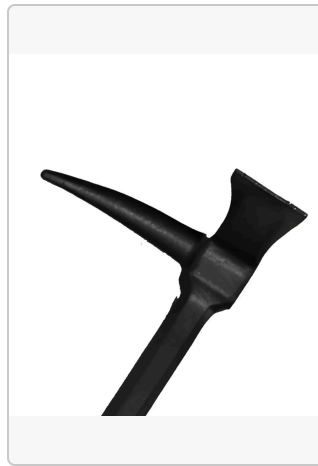

#### KEY-IN-KNOB FORK GAP

Gap between the fork ends pulls "key-in-knob" cylinders cleanly. Squared-off shoulders give a flat striking surface for axe or sledge.

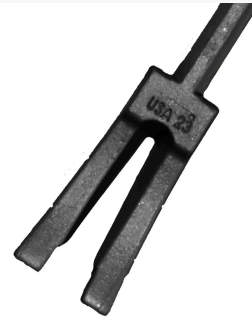

#### MATTE BLACK FINISH

Matte black finish deters rust and supports stealth deployments — keeps the tool low-visibility during night operations.

FORGED. DRESSED. READY.

### TESTED & CERTIFIED

#### BUILT WITH TOP FIRST RESPONDERS AND LAW ENFORCEMENT

Drop forged in one piece from 4140 alloy steel. Heat-treated working ends. 2" offset adze with 30" radial arc and reference line. Squared shoulders for flat striking. Key-in-knob fork gap. Matte black finish for rust deterrence and low-visibility deployment.

#### IDEAL FOR:

LAW ENFORCEMENT

FIRE & RESCUE

ENTRY & BREACH TEAMS

SWAT & TACTICAL

FIRST RESPONDERS

SCHOOL EMERGENCY LOCKERS
